YOUR ONE SOURCE FOR PUMPS,
PUMP EQUIPMENT, SERVICE,
AND REPAIR.

ALL-FLO

- air-operated diaphragm pumps, 1/4" – 2"
- non-metallic, aluminum, and stainless steel

AMPCO

- stainless steel 3A and CIP sanitary pumps
- nickel aluminum bronze marine pumps
- stainless steel marine pumps
- bronze self-priming marine pumps

BERKELEY

- end suction centrifugals, submersibles, and self-priming
- engine driven, close-coupled, frame mounted

BLACKMER

- unique sliding vane positive displacement viscosity to 5,000,000 ssu, temp to 500°F differential pressures to 200 psi
- cast iron and stainless steel
- gas compressors for liquid transfer and vapor recovery
- seal-less magnetic drive

BURKS

- centrifugal close coupled pumps
- centrifugal self-priming pumps
- regenerative turbine pumps
- sump pumps

CASCADE

- axial and mixed flow pumps

CONTINENTAL

- progressive cavity pumps

CORNELL

- high-efficiency centrifugal pumps
- non-clog solids handling, close coupled food handling
- engine driven, vertical sump pumps
- redi-prime self-priming, dry lift pumps

CRANE DEMING

- end suction centrifugals
- ANSI B73.1 and in-line pumps
- vertical process and sump pumps
- dry and wet pit solids handling pumps
- vertical turbine pumps and horizontal split case pumps
- air-operated diaphragm pumps
- self-priming pumps (formerly CROWN)

EBARA

- submersible effluent and sewage pumps
- vortexing non-clog pumps and propeller pumps
- explosion proof available
- 304SS end-suction and submersible pumps

GATOR PRIME™

- self-priming pumps 2" to 12"
- solids handling/sewage pumps
- cast iron, stainless steel, CD4MCU

GENERAL

- high-pressure plunger & piston pumps and pump systems

GILKES

- industrial and marine self-priming pumps
- cast iron, bronze, or stainless steel

GOULDS

- submersible effluent and sewage pumps
- turbine pumps
- centrifugal pumps
- multi-stage pressure boosting pumps

GRISWOLD

- ANSI chemical pumps
- submersible turbine pumps
- centrifugal self-priming pumps
- centrifugal close coupled pumps

GRUNDFOS

- single and multi-stage centrifugal pumps
- horizontal and in-line designs
- stainless steel submersible pumps
- circulating pumps
- convertible jet pumps
- all stainless steel or stainless steel wetted internals standard

GTO RHINO®/GTO GATOR®

- high pressure centrifugal pumps
- pressures to 2000 psi, flows to 400 gpm
- pulsation free, continuous operation at shutoff, ductile iron construction
- options include stainless, CD4MCU
- other metallurgy available

HIDROSTAL

- fish processing, net unloading, boat offloading applications
- capable of pumping live fish

LMI

- metering pumps

LUTZ

- drum and container pumps electric or pneumatic in a variety of constructions
- pumps for every drum and transfer operation

MARCH

- seal-less magnetic drive pumps
- condensate pumps
- submersible pumps
- metering pumps
- "new" self-priming magnetic drive pumps

MTH

- boiler feed regenerative turbine pumps
- canned motor pumps
- vertical and horizontal pumps

MURZAN

- sanitary pumps and unloading systems

OBERDORFER

- positive displacement and centrifugal marine pumps
- rubber impeller pumps
- bronze gear pumps
- bronze centrifugal pumps
- bronze self-priming pumps
- stainless steel and non-metallic chemical gear pumps

PRICE PUMP

- horizontal and vertical pumps
- cast iron, bronze, 316SS, CPVC, PVDF

PITT BULL

- pneumatic sump trash pumps
- handles abrasives and corrosives

SELECTRIC

- custom designed control panels
- variable frequency drives and accessories

THERMAL ENGINEERING

- direct contact water heater
- heat recovery systems
- ultra-efficient water heater
- stack gas heat absorber
- shell and tube heat exchanger

THOM-JET

- horizontal multistage in cast iron
- stainless steel fitted and all stainless steel
- capacities to 4000 gpm and heads to 1800'
- temperatures to 350°F
- mechanical seals to suit application

WANNER HYDRACELL

- hydracell seal-less high-pressure pumps
- flows to 40 gpm, pressures to 1500 psi

WARREN RUPP-MARATHON PUMP

- air-operated diaphragm and sump pumps
- aluminum, cast iron, 316SS, non-metallic
- ball valve or flap valve construction
- replacement parts kits to fit Wilden, ARO and VersaMatic pumps

WDM/RUHRPUMPEN

- ANSI, process pumps, horizontal split case vertical turbine, axial, and mixed flow pumps
- API 610, paper stock pumps

WEINMAN

- non-clogging, self-priming, recessed impeller, solids, and water pumps
- end suction centrifugals
- vertical sump pumps
- dry and wet pit solids handling pumps
- vertical turbine pumps
- horizontal split case pumps
- self-priming pumps (formerly CROWN)

WRIGHT PUMP

- sanitary lobe pumps

“HOT SHOT” Steam Injection Hot Water Systems. Direct steam injection with patented no moving parts technology. 99% efficient and maintenance free system.

MISCELLANEOUS

DRUM and BARREL PUMPS

Blackmer hand operated
Flux electric and air operated
All-Flo air operated
Standard electric and air operated

ELECTRIC MOTORS

Baldor-Reliance
Leeson-Lincoln
Marathon
Toshiba
U. S. Electric-Emerson
WEG
Worldwide Electric

**Warehouse stock may not be available at all locations.

ALSO AVAILABLE

Andron stainless fittings
JE Adams high-pressure spray guns
Mueller and Keckley valves and strainers
Nord gear reducers
Programmable logic controllers
Spraying Systems nozzles
U.S. Seals
Woods, Lovejoy, and Dodge couplings

SALES PERSONNEL

At Thomas Pump & Machinery Inc., we strive to provide superior customer service. It is our job to offer you a versatile line of pumps for most pumping applications. We are always standing by to assist you with pump selection, technical questions, order placement, and order expediting. For years, we have been able to meet these standards consistently.

SERVICE AND REPAIR

At Thomas Pump & Machinery Inc., our customer service does not stop when we make a sale. We have highly trained machinists that specialize in servicing pumps and pump packages. **WE SPECIALIZE IN PITOT TUBE PUMP REPAIRS.** Our repair facilities are complete with Hofmann high-speed balancing machines, lathes, sandblasters, a vertical drill press, a high-pressure hot water steam cleaner, milling machines, and much more. The expertise of our technicians encompasses more than welding and sandblasting. They are qualified for field service and engineering as well as for troubleshooting systems. If your pump is in need of repair, we can be reached 24 hours a day, 7 days a week. In most cases, we can send you an exchange pump within hours after your call.
